## About Me

---

Two of my biggest passions are problem solving and creativity. I fell in love with coding because it's a perfect combination of those elements. I love being able to bring my excitement for development to every project I work on!

## Technical Skills

---

**Languages:** JavaScript, C#, Python, HTML, CSS, SCSS

**Frameworks:** Vue, ASP.NET Core, Django, Express,

**Databases:** MySQL, PostgreSQL, MongoDB

**Other:** jQuery, Bootstrap, Github

## Experience

---

### **Creative Coding** - *Assistant Teacher & Web Developer (Sep 2017-present)*

- Use Scratch to teach coding fundamentals to elementary and middle school aged children
- Currently teach 4 classes at 2 schools with up to 14 students
- Work one-on-one with students as they develop projects of their own creation
- Development includes front-end work on the teachers platform using HTML, SCSS, JavaScript, and PHP

### **Chipotle Mexican Grill** - *Crew Member (Dec 2017-present)*

- Provide friendly service while assisting customers with their orders
- Responsible for prepping and frying foods before the store opens

### **Coding Dojo** - *Full Stack Web Development (Feb 2017 - June 2017)*

- Spent 1,000+ hours completing an immersive 14-week web development program
- Learned three stacks including: Python with Django, C# with ASP.NET Core, and the MEAN stack
- Learned and practiced algorithms using different data structures daily
- Achieved black belts in Python and C# by building and deploying a web app built from a wireframe in 4.5 hours

### **Fred Meyer** - *Home Electronics Price Changer (Oct 2013 - Feb 2017)*

- Responsible for customer service, price changing, cashiering, stocking, housekeeping, and freight
- As price changer I regularly achieved weekly auditing goal of 1% pricing errors
- Successfully prepped, set ads, and worked the floor during four holiday seasons including high traffic days such as Thanksgiving, Black Friday, and Christmas Eve
- Acted as PIC when needed which included aiding the customer service desk with returns, writing the daily to-do list, and taking care of any issues came up

### **Safety Team Member (June 2014 - June 2016) & Safety Team Lead (June 2016 - Feb 2017)**

- Completed store safety audits every period
- Collaborated with managers to find solutions to safety issues
- Lead team meetings and organized safety events which resulted in getting our store Safety Certified in January of 2017

## Experience

---

### Backup Store Auditor (*May 2014 - Feb 2017*)

- Responsible for completing weekly pricing audits in all departments, excluding food, when auditor was on vacation
- Regularly completed audits ahead of schedule

### Sereina Charise Photography - Owner & Photographer (*Oct 2012 - Dec 2013*)

- Provided personalized on-location portrait sessions and event photography
- Culled and edited photos in Adobe Lightroom with custom presets
- Created, designed, and managed website and blog with WordPress

## Projects

---

### Photography Portfolio - *JavaScript, Vue, Node, Express, MongoDB, HTML, CSS*

This project started off challenging as I spent a couple of weeks learning how to connect Vue to Express for the first time. My main goal was creating a visually appealing design and making the site responsive. Displaying all of the images and creating a dynamic navbar that converts to a menu button for smaller screens were the two biggest features. The admin page utilizes Dropzone.js to upload photos to the server.

### Sage - *JavaScript, jQuery, HTML, CSS*

Sage is a site designed to help connect women in tech with mentors and was created during TUNE's WeHack 2017 hackathon in a span of 24 hours. My responsibilities were on the front-end, making the rough draft of the home and dashboard pages, then adding a color scheme, images, and making it look polished. With the time constraint we stuck with classic jQuery, JavaScript, HTML, and CSS to allow us to add as much content as possible. Working in such a short timeframe with a new team was a great opportunity to work on team skills. Making sure we were communicating clearly and all on the same page was essential and having an established workflow made life easier.

### Image Upload Tutorial - *C#, ASP.NET Core, HTML, CSS*

After struggling on my own trying to figure out how to upload images to the server with ASP.NET Core, I created a tutorial with the goal of simplifying the process for others. The tutorial is on Github and walks you through the process with code snippets, notes about important elements, and a working demo for reference and to see the uploading in action!
